

TaxIQ Fees

Tax Loss Harvesting Tool Fee 10 bps annual

The Tax Loss Harvesting Tool Fee ("TLH Tool Fee") varies based on the models in the account, as detailed below:

Custom Models
Free Model Marketplace Models

Fee-bearing Model Marketplace Models

Fee applies Fee applies Waived

1

The TLH Tool Fee is prorated based on the portion of the account modeled to a custom or free model and amount of time the TLH Tool was active in the account. All TLH Tool Fee will be waived until October 1, 2024. Starting on October 1, 2024, the TLH Tool Fee will begin accruing and will be billed in November 2024.

Model Marketplace Fees

Explicit fee charged by Altruist LLC for using the Model Marketplace.

Model Licensing Fee

*These model portfolios are generated by Altruist LLC and are constructed using Dimensional Fund Advisors ("DFA") funds.

- All model portfolios belonging to a specific series have the same Model Marketplace fee.
- The Model Marketplace fees are calculated in arrears at the end of each month, based on the average account balance for the month, and will appear in the appropriate account statement. When a model portfolio is subscribed to an account for part of a month, the fees are calculated pro-rata, starting with the day of the month when the account is first invested in the model portfolio, and ending with the calendar day when the model portfolio is unsubscribed by the registered investment adviser ("RIA") with discretion over the account. Likewise, TaxlQ fees are calculated in arrears at the end of each month, based on the average daily balance of eligible assets in an account for the month, and will appear in the appropriate account statement. When an account utilizes TaxlQ for part of a month, the fees are calculated pro-rata, starting with the day of the month when TaxlQ was activated in the account, and ending with the calendar day when TaxlQ was deactivated by the registered investment adviser ("RIA") with discretion over the account. Both the Model Marketplace fees and the TaxlQ fees will be automatically deducted from the RIAs' house accounts or passed through to clients' accounts, according to the instruction of the RIA. If Altruist LLC is unable to deduct a fee from a client's account according to an instruction from an RIA such as if the client's account is closed prior to the fee being deducted then the RIA is responsible for such fee (please see Appendix C of the Model Marketplace Agreement found at altruist.com/legal) and as a result the fee may be deducted from the RIA's house account. Any fees deducted from the RIA's house account can be viewed in the house account statement, which can be accessed by visiting Settings > House Account > Statements.
- The passing of TaxIQ fees or Model Marketplace fees to an RIA client account does not imply an investment adviser-client relationship between Altruist LLC or its affiliates and any RIA client. RIAs are responsible for the suitability of all transactions and decisions regarding client accounts and must maintain discretion over client accounts that are subscribed to Model Marketplace model portfolios.
- Third-party-provided model portfolios incur a Model Licensing Fee paid to Altruist LLC for Altruist LLC making the models available
 to RIAs for their use in independently managing or advising their clients' accounts. The Model Licensing Fee paid to Altruist LLC is
 for making third-party portfolios available to RIAs to subscribe to client accounts and is not investment advice and is not an advisory service.
- Altruist-generated model portfolios incur a Model Portfolio Fee for Altruist LLC generating those model portfolios, paid to Altruist LLC.
- Any fund transaction charges that may be incurred as a result of trading funds in a model portfolio available through the Model Marketplace are subsidized by Altruist and not charged to the advisor or client account.
- Any of the model portfolios made available on the Altruist Model Marketplace could include ETFs and/or Mutual Funds which might
 have implicit costs associated with them, such as an expense ratio, which won't be present on the account statement. The expense ratio of a mutual fund/ETF reflects how much it pays for portfolio management, administration, and marketing, among other
 expenses. This fee is deducted from the total market value of the fund/ETF on a periodic basis and can impact the net investment
 performance of the account.
- The TaxIQ fees or the Model Marketplace fees do not include other related costs and expenses including transfer fees, administrative fees, and other fees and taxes on brokerage accounts and securities transactions assessed by Altruist LLC's affiliated broker-dealer Altruist Financial LLC, or third parties. Please visit altruist.com/legal for the Altruist Financial LLC Fee Schedule.
- For custom model portfolios, any allocation to Model Marketplace model(s) will incur the applicable Model Marketplace fees (Model Portfolio fees for Altruist-generated model portfolios and/or Model Licensing fees for third party-provided model portfolios). This

"blended model marketplace fee" will be calculated as a weighted average of applicable Model Marketplace fees based on the allocation of the Model Marketplace model(s) within the custom model portfolio, the duration the custom portfolio is assigned to the client account, and the average monthly balance of the client account. Blended model marketplace fees can be found upon custom model portfolio creation and editing (under the "Portfolio Fee" section), upon custom model portfolio assignment (on the "Review" screen), and are also available in the custom model portfolio's details drawer within the Custom Models section of the Altruist platform. These fees are expressed in basis points (bps) annually, assessed monthly and may be deducted from the RIA's house account or passed through to clients' accounts according to the instruction of the RIA. Custom model portfolios may be subject in their entirety to certain other portfolio fees depending on the services chosen by the RIA. Those service fees as well as the blended model marketplace fee comprise the overall "portfolio fee" displayed for custom model portfolios on the Altruist platform. Note that any non-Model Marketplace model allocations with a custom model portfolio will not incur any Model Marketplace fees, but will be subject to certain additional fees and expenses as outlined in Altruist Financial LLC's applicable brokerage fee schedule.

- RIAs separately provide advisory and other services for which they assess fees. The fees RIAs charge their clients are separate
 from the Model Marketplace fees (though an RIA may choose to pay the Model Marketplace fees from their house account and potentially increase their own fees to their clients as a result), the fees of Altruist Financial LLC or third parties, and the underlying fees
 and expenses of the funds within the model portfolios.
- RIAs are responsible for obtaining consent from their clients if they wish to pass TaxIQ fees or Model Marketplace fees through
 to client accounts, and are responsible for informing clients of all other fees applicable to client accounts as well. Please carefully
 review customer account statements, RIA billing statements, and the Altruist LLC Form ADV Part 2A available at altruist.com/legal,
 and contact us at support@altruist.com with any questions.
- RIAs that run wrap fee programs are responsible to ensure that they are doing so in a compliant manner, including with respect to Model Marketplace fees.
- The Model Marketplace fees were waived through June 2022 and have been assessed starting July 2022.
- Altruist's Strategist investment minimum starts at \$2,000 and varies depending on the equity allocation of the model portfolio.
- · Altruist Strategist Direct Index when used as a standalone strategy (via UMA) has a \$1,200 investment minimum
- SMA model portfolio investment minimums start at \$1,000. Refer to model details in the Model Marketplace for more information.
- TaxlQ fees will be waived through September 2024 and will begin being assessed starting in October 2024.
- TaxIQ fees do not apply to fee-bearing Model Marketplace models and portfolio(s). For custom portfolios containing both fee
 bearing and non-fee bearing Model Marketplace models, TaxIQ fees will be prorated on the allocation of the non-fee bearing Model
 Marketplace models within the custom portfolio. TaxIQ fees will be based on the duration of usage and the average account balance
 for this allocation in the custom portfolio. These fees are expressed in basis points (bps) annually, assessed monthly and may be
 deducted from the RIA's house account or passed through to clients' accounts according to the instruction of the RIA.
- Assets in client accounts that are ineligible for rebalancing (i.e., individual fixed income instruments, security exclusions) will not be
 included when calculating TaxIQ fees.
